**YOUR BATTERY HAS ONE JOB:
TO KEEP YOUR RADIO WORKING!**

YOUR PROMO HERE

YOUR RADIO IS ONLY AS RELIABLE AS THE BATTERY THAT POWERS IT MAKE SURE IT'S PROVEN TOUGH.

BATTERY QUALITY DIFFERENCES – WHAT TO LOOK FOR:

To make your job easier in selecting the right battery, it's important to understand the differences in battery quality. Battery components and manufacturing processes are not all alike. Knowing these differences can help you make the best purchase decision and choose the right battery for your needs.

When manufacturing batteries, Motorola employs the highest standards of quality and consistency to ensure its batteries meet the rugged requirements of real-world use.

BATTERY CHEMISTRIES FOR DIFFERENT NEEDS:

As you evaluate the type of batteries you need (Nickel Cadmium, Nickel-Metal Hydride, or Lithium Ion), consider how your firm works. How often will your batteries need to be recharged? Will you need a battery that provides the longest cycle life possible? Will your batteries be exposed to extreme temperature conditions? Answers to these questions will help determine the type of battery you need.

MOTOROLA TWO-WAY RADIO BATTERIES:

Nothing beats Motorola Original® batteries, because “as good as” never is. When staying productive means staying in touch, you need batteries you can depend on day in and day out. You can trust Motorola batteries to work better and last longer than ordinary replacement batteries – maximizing productivity and keeping your people in touch.
